

SECURITY, COMPLIANCE, EDUCATION FOR RADIOLOGY

According to HHS, 275 million images are now unsecured due to vulnerabilities in medical imaging servers, and the healthcare industry, particularly radiology, has experienced a 55% increase in breaches in recent years. RADassure helps radiology practices address these vulnerabilities with a variety of HIPAA & cybersecurity technology, compliance, & consulting solutions.

RADassure's LAW platform (LAW = "learning & audit ware") provides medical facilities with a one-stop-shop for staff education, documentation, policy/procedure management, and auditing related to HIPAA, cybersecurity, as well as a variety of safety and other topics.

LAW PLATFORM FEATURES

- access to training & audit templates anytime, anywhere
- an assortment of HIPAA, cybersecurity, and other training modules
- ability to easily incorporate your own course materials
- pre-built, customizable HIPAA & cybersecurity audit templates
- on-line testing, training management, and record keeping
- on-line auditing, audit management, and record keeping
- electronic signatures and acknowledgement for policies and procedures
- automatic staff email notifications and reminders
- secure, encrypted, privilege-based access to records and materials
- quickly deployable SaaS model

Delivery, documentation, and compliance have never been more efficient or cost-effective.

SECURITY SOLUTIONS

RADassure offers an integrated enterprise monitoring system (SIEM) that includes threat protection, integrity monitoring, incident response, & compliance tools.

Benefits & Key Features:

- Fully protected data, regular application of security patches and hardening practices. -A ready to use solution, with no additional hardware or software required, driving down the cost and complexity.
- A flexible infrastructure that you can tailor to meet specific needs and upgrade it to the most appropriate tier.
- Unlimited deployment of agents to your systems, in your cloud or on-premises environments.
- Environments are always updated to the latest version, with no manual maintenance or upgrades required.

Radiology administrators:

- ✓ Save time.
- ✓ Save money.
- ✓ Increase compliance.
- ✓ Secure your practice.
